1.1	Eric Landaverde, Xavier Amparo	03/06/2024	Revised user stories to match changes to Sprint 1 scope
1.2	Xavier Amparo, Joseph Tomasello	03/20/2024	Revised user stories according to feedback received during Sprint 1 presentation
1.3	Eric Landaverde, Xavier Amparo	03/22/2024	Added user stories based on Sprint 2 deliverables

Sprint 1

User Story 1U: Disclaimer

As an unsubscribed end user, I want to be able to accept access into the site after viewing the disclaimer regarding usage upon entry to the page.

Maps to Test Case 1

Acceptance Criteria:
- The user is able to read and accept the conditions of the disclaimer by selecting 'accept'
- The user is able to view the disclaimer at any time through a dedicated function located on the homepage leading to the disclaimer page
- The user is able to decline the disclaimer, and when this is done, they are sent to a webpage that will show the disclaimer again stating that they cannot view the website unless they select 'accept'
- Users can always view the disclaimer for reference purposes on the landing page.

Acceptance Testing:
- After accepting the terms of the pop-up, the user can view the landing page unobstructed
- If user does not accept the terms, they are taken to the disclaimer.php page
- If the user accepts the terms on disclaimer.php, they can view the landing page unobstructed
- Once accepted, the disclaimer should always be viewable

User Story 2U: Register

Maps to Test Case 2

As an unsubscribed end user, I want to be able to register an account to access the subscriber user tier for notifications regarding updates in the form of new bills passed as well as being able to access the other subscribed user functions.

Acceptance Criteria:
- Can select the subscribe function and be sent to the registration page.
- Can fill in required field (email) in textbox
- Can fill in required password text field that specifies the input which must meet the following criteria:
    - minimum of 8 characters
    - must contain at least 1 special character
    - must contain at least 1 uppercase character
    - must contain at least 1 numeric character
- Can select the register function to register and then be informed that a confirmation email has been sent to the user's email

- A notification will be sent within 1 minute to the inbox or spam folder of the email inputted by the prospective user. It will contain a verification code to confirm their registration.
- The user will input the verification code sent to their email to confirm their registration
- The user will be prompted that they successfully registered an account on the website

Acceptance Testing:
- When unsubscribed, user can select the 'register' function
- An email and password can be set by the user.
- Proposed password must comply with length, upper and lower case letters, numbers, and special character inclusion.
- The user receives an email after confirming their email and password containing a required verification code
- The user can input the required verification code to complete the registration process
- Credentials (email and password) are added database after registration is finalized
- User can login using their email and password

User Story 3RU: Login/Subscribed Resources

Maps to Test Case 3

As a subscribed end user, I want to be able to login to my account using my email and password to gain access to the site. The full functionality of the site should be made available to me upon doing so.

Acceptance Criteria:
- Can access the login page using the "Login" link on the landing page
- Can fill in required field (email) in textbox
- Can fill in required password text field
- If the user selects 'forgot password', they are then taken to a page that allows them to reset their password.
- Can input their email address to receive a password change verification code
- Can input a new password
- Can login using their new password
- AI Lawyer section is no longer grayed out
- Settings Page is made available in top right of screen(a different use case)
- Logout option is also made available in top right of screen

Acceptance Testing:
- User can login using their credentials
- User can select the "Forgot password" function on the login page
- User can input their email to receive a verification code
- User can input the verification code and enter a new password for their account
- The user's password is updated in the database to reflect the password change
- $_COOKIE variable must be set in inspection mode

User Story 4RU: Password Reset

Maps to Test Case 4

As a subscribed end user, I want to be able to reset the password associated with my account if I forget it/want to change it.

Acceptance Criteria:
- From the login page, the user should be able to select "Forgot password".
- The user should be able to input their email to receive a verification code to it, in order to validate the password change request.
- The user should be able to input the verification code they received to access the new password inputs.
- The user should be able to input their desired new password into the website and submit it to change their currently active password.
- The user should be redirected to a page that states the password change was successful, and then be redirected to the login page.

Acceptance Testing:
- The user can view the "Forgot password" function on the login page
- The user can select the "Forgot password" function on the login page and be redirected to the password reset page
- The user can input their registered email address to receive a verification code
- The user can enter the verification code they received through their email to access the new password inputs
- The user can input their desired new password and submit to update their currently active password
- The user can be redirected and view the page informing them the password change was successful
- The user can be redirected to the login page
- The user can successfully login with their updated password

User Story 5RU: Delete Account

Maps to Test Case 5

As a registered end user, I want to be able to view my user account settings and deregister from the website.

Acceptance Criteria:
- Once the user is logged in and on the homepage, they should be able to select the user account settings link and be brought to the corresponding webpage
- User can deregister by inputting their email and selecting the deregistration function

Acceptance Testing:
- User can view user account settings
- User can access the deregister feature
- User should be able to input their email
- User should not be able to log back in using the same credentials (the email and password associated with the account they just deregistered)

Sprint 2

User Story 1U: Search

As an unsubscribed end user, I want to be able to search for legislation and with the usage of filters for different legislative subjects and sessions.

Acceptance Criteria:
- The user is required to select a legislative subject from the dropdown menu of category values with a visual confirmation of the selection.
- The user is required to select a legislative session from the dropdown menu of sessions with a visual confirmation of the selection.
- The user must select both filters at the same time to perform a search
- The user can select the search function and will be redirected to the indexresults.php page.
- The user can view the results of the search showing the bill number, session, subject, and the link to the original source.
- The user can select one of the results and can select the 'summary' function to be redirected to the indexsummary.php page.

Acceptance Testing:
- After selecting a filter, the filter has a visual cue showing that the category has been selected
- A search cannot be performed if a legislative session and category are not selected. If a search is attempted and a session is not selected, a prompt should appear informing the user to select a session
- The search results must appear to the user after a search has been made
- A search result can be selected for further actions by the user
- All the combinations of legislative sessions and subjects should be tested to ensure that the results change according to all filter combinations

User Story 2U: Legislative Summary

As an unsubscribed end user, I want to be able to view a summary of a selected bill after I search for and select a bill from the results.

Acceptance Criteria:
- The user can select a legislative bill from search results after selecting both the session and subject filtering and clicking on the search function
- The user can view a text summary of the selected bill in the indexresults.php page after clicking the bill from the search results

Acceptance Testing:
- The user can view the summary for the bill after it has been selected from search results
- Selecting a different result changes the summary to correspond to the newly selected legislation

User Story 3RU: Category Saving

As a subscribed end user, I want to be able to select a legislative subject on the user account settings page to be able to receive email notifications when the web application has made an update to their data repository regarding new legislation.

Acceptance Criteria:
- The subscribed user can select a legislative subject from the displayed categories and have a visual confirmation of their selection.
- The subscribed user will be informed through a prompt after selection that they will receive email notifications of updates to that category
- The subscribed user will receive an email during weeks where there are changes to their chosen category informing the user that an update has been made, a summary of the amount of records added to the database, their legislative session(s), and bill ids.
- The subscribed user can deselect a legislative subject and no longer receive emails for that category.
- The subscribed user can select multiple legislative subjects.

Acceptance Testing:
- User can select 1 or more legislative subjects
- User can receive and view the notification emails sent on weeks when changes to the user's chosen category are made
- User can deselect legislative subjects and will stop receiving emails for those subjects
